CONSTRUCTION INDUSTRY INTELLIGENCE

Construction intelligence built on authoritative project records—turning construction activity into governed signals, priorities, recommendations, decisions, and evidence.

THE PROBLEM

\$2.16T US construction with fragmented systems. Records scattered, knowledge lost, compliance burden growing, AI ungoverned.

THE SOLUTION

Lifecycle platform: Records → Signals → Needs Attention → Human Decision → Evidence. Coexists with existing systems.

CAPABILITIES (VERIFICATION PENDING)

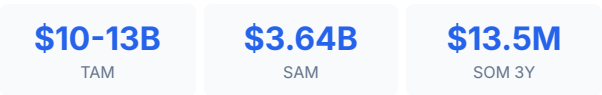

- Universal Search
- Needs Attention
- Tenant Isolation
- RFI Management
- Intelligence Home
- Daily Coordination

Gate 02 verification in progress

DIFFERENTIATION

Intelligence Architecture: Construction-specific
Human Governance: AI assists, humans decide
Integration: Coexists with existing systems

MARKET OPPORTUNITY

TAM external. SAM/SOM internal planning.

TARGET SEGMENTS

Public Owners • General Contractors • CMs • Specialty Contractors

BUSINESS MODEL

SaaS: Free (ongoing) → Pro (teams) → Enterprise
Unit economics not disclosed

READINESS
Platform deployed • Verification pending • SOC 2 in progress
Traction not disclosed

COMPETITIVE POSITION

vs Procore/Autodesk: Human-governed intelligence, coexistence
vs Visual AI (Buildots, OpenSpace): Authoritative records, lifecycle
