

Construction Industry Intelligence Platform

Operational construction software with connected intelligence across the construction lifecycle.

Multi-tenant - Enterprise-ready - Construction-native

Operational lifecycle software
commercially deployable

QTO from document to reviewed
estimate

Human-governed Construction
Intelligence

PROBLEM

No single project truth. Disconnected tools and re-keyed data.

PLATFORM

Operational lifecycle software plus Construction Intelligence.
Intelligence does not replace operations.

LIFECYCLE

Opportunity -> Preconstruction -> QTO / Estimate -> Procurement ->
Project Delivery -> Field -> Schedule -> Cost -> Safety / Quality ->
Compliance -> Closeout -> Portfolio / Executive

DIFFERENTIATION

Lifecycle operations plus Construction Industry Intelligence. QTO
is one proof of connected workflow, not the whole platform.

QTO PROOF

Document -> Scope -> CSI -> Quantities -> Review -> Estimate.
Human-controlled. Every quantity is reviewed before import. No silent
overwrite.

BUSINESS MODEL

Available today: SaaS subscription - Enterprise licensing - Premium
construction capabilities - Implementation and services where applicable

EXPANSION

Planned: AI usage and credits - Premium integrations - API / embedded
intelligence - Enterprise and private deployment - Selective OEM /
white-label

READINESS

- Commercial product accepted
- QTO commercial core complete
- Construction Intelligence deployed
- Operational lifecycle modules available
- Company and platform administration
- Demo and contact conversion live
- iOS and Android listings
- GTM measurement infrastructure live
- Intelligence cost controls implemented; generative inference is Planned

INVESTOR CTA

Investor discussion, strategic partnership, or enterprise demonstration.

ENTERPRISE SECURITY & GOVERNANCE

Multi-tenant isolation - Role-based access control - Audit trail on record changes - Human-governed intelligence (no autonomous writes) -
Third-party attestation planned
