

INVESTOR OVERVIEW

Construction Industry Intelligence Platform

From drawings and estimates to field execution, cost, compliance and executive decisions.

Construction still runs on disconnected systems.

No single project truth.

- Estimating
- Project controls
- Field
- Documents
- Procurement
- Schedule

An operational platform plus intelligence - not intelligence instead of operations.

- Operational construction platform
- Construction Intelligence
- Multi-tenant, role-based, audit-trailed

Coverage across the construction lifecycle.

- Opportunity
- Preconstruction
- QTO / Estimate
- Procurement
- Project Delivery
- Field
- Schedule
- Cost
- Safety / Quality
- Compliance
- Closeout
- Portfolio / Executive

All twelve stages - Available today.

Operational workflows produce the evidence that powers intelligence.

Projects, documents, RFIs, submittals, field, schedule, cost, and compliance sit on one operating record.

- Project operations across the construction lifecycle
- QTO from document to reviewed estimate
- Construction Intelligence on the operating record
- Company and platform administration

QTO is the tangible differentiator: document to reviewed estimate.

- Document
- Scope
- CSI
- Quantities
- Review
- Estimate

Human-controlled. Every quantity is reviewed before import. No silent overwrite.

Construction Intelligence is advisory and evidence-linked.

Governed generative assistance is planned. No customer-facing model inference is enabled today.

- Needs Attention
- Decisions Needed
- Outlook
- Evidence

Recommendations are advisory. Ezelogs does not take autonomous action on project records.

Who pays: the people who run construction work.

- General contractors
- Specialty contractors
- Construction managers
- Owners
- Public agencies
- Program managers
- Preconstruction / estimating
- Executive / portfolio leaders

Current revenue is software. Expansion is labelled Planned.

- Available today: SaaS subscription
- Available today: Enterprise licensing
- Available today: Premium construction capabilities
- Available today: Implementation and services where applicable
- Planned: AI usage and credits
- Planned: Premium integrations
- Planned: API / embedded intelligence

Distribution channels are in place.

- Direct enterprise
- Public sector
- Partners
- Product-led demo
- App listings
- Professional network
- Content and search
- Strategic partnership

Commercial infrastructure and GTM channels are in place.

- Commercial product accepted
- QTO commercial core complete
- Construction Intelligence deployed
- Operational lifecycle modules available
- Company and platform administration
- Demo and contact conversion live
- iOS and Android listings
- GTM measurement infrastructure live
- Intelligence cost controls implemented; generative inference is Planned

Building the intelligence platform for construction.

Enterprise security & governance: Multi-tenant isolation - Role-based access control - Audit trail on record changes - Human-governed intelligence (no autonomous writes) - Third-party attestation planned
