

Construction Intelligence Infrastructure™

Construction Intelligence Infrastructure™ — the operating system for the built environment.

PROBLEM

\$17T industry running on spreadsheets, PDFs, and disconnected software. No institutional memory. No vertical AI foundation.

PLATFORM

Construction-native ontology · Knowledge graph · Lifecycle engine · Industry signals · 17 AI agents · Robotics-ready resource pool

GRAPH

60+ entities · relationships · lineage · evidence · signals overlay.

ARCHITECTURE

13 layers from Cloud Infrastructure → Experience.

REVENUE

Enterprise SaaS · usage · marketplace · developer platform · benchmarks.

MARKET

\$17T

Global construction

\$2.4T

Capital programs

\$140B

Vertical software

Robotics-ready

25-YEAR ROADMAP

- 2026 launch
- 2028 enterprise
- 2030 robotics
- 2040 infrastructure OS
- 2050 built-env OS

Invest in the operating system for the built environment.
